 - [presentation of methodological design and operationalization]

Overview

We include elections and cabinets in *established democracies*. More specifically, we include democratic national lower house elections and EP elections for *all EU and most OECD members*. For the latter, we exclude presidential systems. We record all elections and succeeding cabinets after 1945 or after full democratization according to Boix ea. (2013).

We also include elections and cabinets before 1945. We record information after 1900 or after the last democratic transition (Boix ea. 2013). As of today, these observations are experimental and may need revision (e.g. largest party with no seats missing).

Parties

Coding rules We include parties winning *more than 1.0% vote share* in elections we cover

Details

- winning 2 seats in an election (eg. member of an electoral alliance)
- party groups that form in parliament
 - more than 5.0% seat share (eg. ITA FLI)

- forming in two parliamentary terms (eg. FRA GDR)
- members of cabinet (eg. SWE NP-AV)
- providing minority support to a cabinet
- electoral alliances and members with at least 2 election results
- no party affiliation
 - candidates with more than 1.0% vote share (eg. IRL I-TJM)
 - includes ‘independent’ (also for presidents)
 - one ‘no party affiliation’ included per country
- less than 1.0% vote share
 - winning 1 seat in 2 elections
 - 2 election results as largest party no seats (first loser)
- special categories: ‘no-seat’ and ‘one-seat’ (see election)

We avoid including minor parties or candidates that win a seat only in one election due to low threshold requirements.

Party change New parties are coded in two tables: party change and party name change.

Mergers and party splits are only added as a new party if the (largest) predecessor party won less than 75% of the combined vote of all preceding parties in the last election. Otherwise the largest party is just renamed (cf. Döring 2016, 539).

Details

- splits and re-mergers coded for original party (eg. JPN DP)
- see also Barnea/Rahat (2011, 311): ‘a new label and that no more than half of its top candidates (top of candidate list or safe districts) originate from a single former party’

Party names Party names are sentence case if no national (language) convention requires title case.

- eg. party names for Germany are title case (German and English)

Party names and delimiters

- ‘-’ different languages
- ‘/’ (‘+’) alliances
- ‘|’ generic names
- [space before and after delimiter]

Year added to smaller party name if identical names exist in a country (eg. SVK SZ-92).

Party positions We provide aggregated party positions in four major dimensions. These positions are time-invariant unweighted mean values of information from party expert surveys on a 0 to 10 scale. All expert surveys are linked with

ids from the party table and original values are rescaled before calculating the mean.

Missing party positions for each dimension are imputed by mean values for the respective party family. We distinguish mean and imputed values by the number of decimal places. Mean values based on external datasets have five decimal places and imputed values have one decimal place only.

Variables and sources

- left/right — Castles/Mair 1983 (*left/right*), Huber/Inglehart 1995 (*left/right*), Benoit/Laver 2006 – (*left/right*), CHES 2010 (*lrgen* 1999 and 2002 and 2006)
- state/market — Benoit/Laver 2006 (*taxes/spending*), CHES 2010 (*lrecon* 1999 and 2002 and 2006)
- liberty/authority — Benoit/Laver 2006 (*social*), CHES 2010 (*galtan* 1999 and 2002 and 2006)
- EU anti/pro — Ray 1999 (*pos96*), Benoit/Laver 2006 (*euauthority* or *eulargerstronger* or *eujoining*), CHES 2010 (*position* 1999 and 2002 and 2006)

Party families We classify parties into families by their position in an economic (state/market) and a cultural (liberty/authority) left/right dimension.

The classification leads to eight party family categories: Communist/Socialist, Green/Ecologist, Social democracy, Liberal, Christian democracy, Agrarian, Conservative, Right-wing.

Parties that can not be classified into the eight categories are coded as ‘spec’ in the party table with more details in the party family table (e.g. AUT Martin). These are mainly special issue parties without a clear left/right profile.

We use one classification for the entire history of a party and do not record changes (e.g. FIN SP|P).

We add further information about party families in a separate table (see party family).

Elections

Coding rules We include election results for

1. all parties that won *1.0% vote share*
2. all parties that won *2 seats* (esp. alliance members)

Details

- a party that won *less than 1.0% vote share* and *1 seat*
 - several election results — included into the list of ParlGov parties
 - single election result — coded as a ‘one-seat’ party (eg. Poland)

- a party that won *less than 1.0%* vote share but was the *largest party that won no seats* (first loser)
 - several election results — included into the list of ParlGov parties
 - single election result — coded as a ‘no-seat’ party (eg. Austria)
- parliamentary party groups – *see below*
 - party group seat compositions different to election results
 - significant changes in the composition of party groups (more than 5.0% seat share)
- mixed-member electoral systems
 - proportional (PR) tier *votes* and *vote share* recorded
- technical party “others”
 - only number of seats coded

Electoral alliances Electoral alliances are coded by linking election results (variable ‘alliance_id’) of alliance members to an alliance or the strongest party in an electoral alliance.

- each electoral alliance or alliance member coded as an individual party should include *2 elections*
- members of alliances with a dominant party are coded to this party
- alliances of parties that are part of a broader alliance are coded with a ‘data_json’ entry ‘alliance_alliance_id’ (eg. Italy 1996)
- *votes* are coded at the level of electoral results for all alliance members
- *seats* are coded for alliance members (parliamentary groups), if feasible
 - seats of an alliance that forms a parliamentary group with members running independently are coded for alliance members and with a ‘parliament change’ (eg. Germany CDU/CSU)
 - seats of alliance members are coded if no information about the parliamentary party group status is available
 - a ‘data_json’ entry ‘seats_alliance’ is added to the alliance to check data consistency
 - a ‘one seat’ party which is part of an electoral alliance is coded as an alliance member (eg. Hungary 2014)

Parliament composition

- changes (> 5%) in seats composition are recorded in ‘parliament change’
 - esp. if changes affect cabinet majority support
- seats composition of parliament at a particular date is recorded in ‘parliament composition’
 - esp. if composition is relevant for cabinet formation (eg. JPN elections after 1996)
- *coding incomplete*
 - significant changes only
 - lack of systematic and reliable sources

Data sources National elections

- Main sources
 - official data source – national statistical office – see country notes
 - Nohlen — Elections: A Data Handbook – various volumes of elections around the world
 - Mackie/Rose (1945–1990) — only Western democracies
 - Essex elections data on Post-Communist Europe (1990–200x)
 - EJPR Political Data Yearbook (1990–today)
 - CEVIPOLE Electoral results — Europe and Latin-America
- Others
 - Parline
 - Rokkan/Meyriat (1920–1965) — only Western democracies
 - Rose/Munro (1990–2001) — Post-Communist Europe

European parliament elections

1. official data source – national statistical office
2. European Parliament (EP) election report (esp. 1979–1999) — based on official statistics
3. EJPR yearbook (1990–today)

Cabinets

Coding rules We record a new cabinet for these events (cf. Budge/Keman 1993: 10)

1. any change of parties with cabinet membership
2. any change of the prime minister
3. any general election

All parties with ministers in cabinet are included (Indridason/Bowler 2014: 396)

1. right to attend cabinet meetings
2. right to cast vote before cabinet (if applicable)

Details

- three month rule
 - a continuation (caretaker) cabinet (subset of previous coalition, no new party) is coded once for any change lasting longer than three months
 - the three month rule refers to the exact day of the date, not the number of days
 - ‘data_json’ entry ‘three_month_rule’ (and ‘cabinet_change’)
 - see also examples section below
- any meaningful investiture procedure defines a new cabinet
 - a PM appointment without a cabinet appointment (eg. ITA Andreotti I, POL Pawlak I)

- a constitutionally required new investiture during a parliamentary term (eg. LTU Skvernelis II+III, see LTU notes)
- any meaningful resignation defines a new cabinet
 - a formal resignation request (eg. AUT Figl III)
 - a successful dissolution request under negative parliamentarism (eg. SWE Erlander VII)
 - a lost vote of confidence (or early election vote) and change to caretaker status (eg. SVK Radicova II, ISR Netanyahu II 1998)
- first appointment event coded
 - successive appointments for one cabinet (e.g. DNK Thorning-Schmidt I)
 - e.g. appointments of PM, cabinet, ministers
- cabinet parties not included
 - ministers without portfolio, interim or junior ministers
 - cabinet members without party affiliation (party family ‘none’) are only coded if the prime minister has no party affiliation (e.g. DEU Papen I)
 - parties supporting a (minority) cabinet are included in table cabinet support — if information available
- splits and mergers of cabinet parties
 - coded as cabinet changes (eg. AUS Schuessel III, CZE Klaus II)
 - ‘data_json’ entry ‘party_split’ and ‘party_merger’
- parliamentary groups and alliances
 - political parties are coded as parliamentary groups (eg. DEU CDU/CSU)
 - alliance members that join a parliamentary group are coded as support parties (eg. POL Szydlo 2015)
- seats at cabinet formation date
 - not coded for each instance of cabinet formation
 - calculated based on
 1. election result *or* parliament composition table – most recent date used
 2. parliament change table entries after (1)
 - used in view cabinet and stored in viewcalc parliament composition
 - see Müller and Strom (2000), Bergman ea. (2019) and ERDDA for exact seats at cabinet formation
- duplicate prime minister names
 - first letter of first name added to PMs with the same last name (e.g. DNK Rasmussen N)
- country specific
 - Switzerland: changes in the identity of the President of the Swiss Confederation (Bundespräsident) do not define a new cabinet (cf. Kriesi/Trechsel 2008, 75-76)
 - Iceland: two prime ministers named Bjarni Benediktsson (born 1908 and 1970)

Examples

- three month constraint
 - POL Kaczynski (2006) — coded as one cabinet
 - * SRP withdraws from cabinet on 22 September 2006 (party composition change) and re-enters on 16 October
 - * SRP and LPR dismissal on 13 August 2007 (party composition change) — elections take place on 19 October 2007 (within three months)
 - BEL Leterme III (2010) — coded as one cabinet (three month constraint)
 - * Previous coalition collapses on 26 April 2010 (party composition change) — new elections on 13 June. Pre-election caretaker cabinets lasts for less and post-election cabinet for more than three months.
 - further examples: AUT Gorbach II (1962), NLD Balkenende V (2010)

Damgaard (1994: 194-95) and Müller/Strom (2000: 12) provide a more comprehensive discussion of cabinet definitions.

Caretaker Cabinets with a limited legislative mandate (cf. McDonnell/Valbruzzi 2014, 664)

- non-partisan: cabinet members without partisan affiliation
- provisional: appointed post-transition cabinet
- technical: institutional reasons
- continuation: remaining in office (see ‘three month rule’ above)
 - resignation of PM or cabinet
 - dissolution of parliament
 - after election until new cabinet forms

Cabinet type Cabinet status (minority, minimum winning or surplus majority) is determined only by the seat share of cabinet parties in parliament and not coded manually.

If there is an electoral alliance with separate seat shares but one of the parties is not a cabinet member, the cabinet will be treated as a minority cabinet (eg. UK 1951). Similarly, if any of the governing parties can be removed and the other governing parties still hold a majority in parliament, the cabinet is considered to be a surplus majority cabinet.

Cabinet termination *Experimental version only* — coding incomplete

The events that define a new cabinet are used to define the termination date. Cabinets may remain in office for a short period after the initial terminal event. The ‘description’ gives a short description of events that led to the end of a cabinet.

Confidence votes *Experimental version only* — coding incomplete

Confidence votes are added for all recent cabinets but are not included for all cabinets in ParlGov.

- investiture (confidence) votes for new cabinets
- confidence votes that lead to the termination of a cabinet
- important (won) confidence votes.

Details

- cabinet description includes a brief entry for a confidence vote
- constructive vote of no confidence
 - coded for outgoing cabinet (eg. DEU Schmitt III, ESP Rajoy IV)

Presidents Party-affiliated heads of state but not short-term acting presidents. See table president.

Data sources For new cabinets and revisions of observations, we derive information about cabinet termination from news sources, preferably from the news agencies Reuters, AFP or the main national news agency

For West European countries we double checked our initial observations with the data in Müller/Strom (2000). For Central- and Eastern European countries we compared our information to Müller-Rommel ea. (2008).

- EJPR yearbook (1990–today) — politicaldatayearbook.com
- European Representative Democracy Data Archive — erdda.se
- Müller/Strom (2000) — Western Europe (1945–2000)
- Müller-Rommel ea. (2008) and Conrad/Golder (2010) — Central/Eastern Europe (1990–2009)
- Flora (1983) — inter-war cabinets
- Wikipedia

Countries

(_) **Country notes**

Summary of main institutional rules and respective changes, data and news sources, references, coding comments, open questions and remaining tasks.

Electoral system information from CLEA country descriptions (Appendix I), ESCE country summaries, IPU-PARLINE electoral system summary, Mackie and Rose (1991), Rokkan and Meyriat (1969)

Cabinet information in Müller and Strøm (2000) and Bergman ea. (2019), see also ERDDA.se data.

Country information about democratisation from Boix ea. (2013).

Abbreviations — proportional representation (PR), single transferable vote (STV)

Additional sources — V-Dem and PIPE data – female suffrage (see IPU)

Note: This is an evolving and incomplete documentation of country specific information.

Australia

Information

- federal parliamentary constitutional monarchy
- head of state is the monarch of UK
- independence in 1901
- full male suffrage by 1900, female suffrage in 1902
- alternative vote (AV) introduced in 1918

Data sources online

- party register
- official election results
- Parliamentary Handbook of the Commonwealth of Australia
- federal election results 1901–2007

Coding comments

- Barber (2008) distinguishes the number of eligible voters between ‘enrolled’ and ‘enrolled divisions’. Enrolled figures represent the total number of eligible voters, while enrolled division figures include only eligible voters in contested districts. The distinction applies to elections between 1901 and 1943.

Todo later

- check and revise LDP election results 2010–2019

- coding of the special district Northern territory (see Barber 2008)

Austria

Information

- federal parliamentary republic

Data sources online

- Federal Chancellery
- elections
- cabinets and ministers
- Meldungen der APA - Austria Presse Agentur aus den Jahren 1955-1985
- AEIOU Österreich-Lexikon cabinets

News in English

- The Local

Open questions

- number of votes for VGO in 1983 election differ between BMI and statistical yearbook
- date of acceptance for the resignation of Figl III cabinet needed
- formal resignation dates for cabinets after 1996 needed, not covered by Müller/Strom 2000

Belgium

Information

- federal parliamentary constitutional monarchy
- full male suffrage in 1893 election, female suffrage in 1948
- PR (D'Hondt) in 1900

Data sources online

- Belgische verkiezingsuitslagen (French/Dutch)

News in English

- Flandersnews

Coding comments

- due to plural voting, the number of total votes is higher than the number of electorate in elections from 1904 to 1914
- data in IBZ and Nohlen/Stöver is not consistent

Open questions

- seat distribution of parties in electoral alliances
 - FDF-PPW alliance in 1991 election

- PRL/FDF alliance in 1995 election
 - * seat distribution
 - * information about PPW (Pari pour la Wallonie)
- SPA/Spirit in 2003 election
- CD&V/N-VA in 2007 election

Bulgaria

Information

- unitary parliamentary republic

Data sources online

- official election results

News in English

- Radio Bulgaria
- Novinite

Coding comments

- 1990 election is not coded since no official results are available (see Nohlen/Stöver 2010: 367). Consequently, the cabinets of Lukanov and Popov are not coded in ParlGov neither.

Open questions

- coding of BSP coalitions – national and EP
 - seat distribution of Democratic Left (1997) and Coalition for Bulgaria (2001, 2005, 2009), esp. seat share of BSP after 2005 election
 - BSP not running as coalition in 2019 EP election?
- missing cyrillic party names
- “electorate” 2009 EP election

Todo later

- double check Blue Coalition EP Elections 2009

Canada

Information

- federal parliamentary constitutional monarchy
- head of state is the monarch of UK
- full male suffrage by 1900 and female suffrage in 1918

Data sources online

- Elections Canada
- Canadian Elections Database
- Prime Minister of Canada

News in English

- Radia Canada – CBC

Coding comments

- the data sources on election results before (and after) 1945 are often inconsistent

Croatia

Data sources online

- Croatian State Electoral Commission

News in English

- Total Croatia News

Coding comments

- official election results are not aggregated at the national level
- voting results for 10 MMC districts recorded
- votes cast on alliance level as votes cast for each alliance member do not add up to total votes cast for an alliance

Open questions

- status and seat strength of parliamentary groups (esp. for electoral alliances)
- seats LIBRA and DC after formation through split (relevant for cabinets)
- 2000 election: 3 no-party seats from ethnic minority district?
- 2007 election: results also recorded for 10 MMC districts only?

Todo later

Data sources are incomplete and inconsistent to meet ParlGov coding rules.

- aggregated number of votes for national, abroad and minority district needed
- information about all parties with more than 1.0% vote share needed
- primary sources about electoral alliances and members needed

Cyprus

Information

- only *presidential system* in ParlGov

Data sources online

- election results

News in English

- Cyprus Mail

Coding comments

- Cyprus has a presidential form of government. Therefore, cabinet start dates may not coincide with election dates. Presidential cabinets are coded according to ParlGov coding rules.

Open questions

- election 2001: official sources needed — votes from Parline do not add up

Todo later

- add primary sources for Wikipedia based coding (national elections: votes for parties with no seats)

Czech Republic

Information

- Unitary parliamentary republic

Data sources online

- official election results

News in English

- Radio.cz (archive 1998-today)
- Prague Monitor
- Prague Post

Open questions

- When crossed members of the rebel faction from ODS to US/DEU? – January 1998
- seat distribution LSU alliance 1992

Denmark

Information

- unitary parliamentary constitutional monarchy
- full male suffrage in 1849 election, female suffrage in 1915
- plurality SMD in 1894
- cabinet responsibility in 1901
- PR (D'Hondt) in 1918

Data sources online

- Danmarks Statistiks valghjemmeside (election results)
- Statistisk Årbog (Statistical Yearbook)

Coding comments

- “‘Comparatively, France has the most poorly documented electoral statistics.’ This statement of Daniele Caramani (2000) must be underlined for various reasons. (...)” (Nohlen 2010, 670). Hence, our coding may include inconsistencies and would profit from feedback by country experts.
- Mackie/Rose election data exclude Algeria and the overseas territories and departments
- Paloheimo (1984) cabinet parties that could not be identified: Gauche Democrats, Movement of Democrats, Payson
- seat strength for some cabinet parties before 1945 unknown – eg. Painleve 1925

Open questions

- How many votes won the Southern League in the legislative election 2012?
- for pre 1945 Wikipedia lists several additional cabinets (no PM or party change), more information needed

Todo later

- double check and update cabinet coding with ERDDA update Müller/Strom (release in 2021)
- code composition of parliamentary groups (see Mackie and Rose 1991, 133)

Germany

Information

- federal parliamentary republic

Data sources online

- Bundeswahlleiter
- Wahlen in Deutschland
- biographical information: Munzinger-Archiv

News in English

- Deutsche Welle

Coding comments

- elections since 1945
 - only PR votes provided (no SMD votes from first tier)
 - before 1990 we don't include the MPs from Berlin (only procedural voting rights)
 - CDU and CSU recorded as alliance with individual results for election data and as CDU/CSU party group for cabinet data
- elections 1919 to 1933
 - some parties won additional seats in a national district (upper tier)
 - upper tier votes are not included
 - see details in Wahlen in Deutschland
- confidence votes 1919 to 1933 not coded in ParlGov - data recorded in "Formative Stages of German Politics. The Contested Rise of Parliamentary Democracy, 1867-1967" by Philip Manow and Valentin Schröder
- successor parties from Weimar Republic (1933) to Federal Republic (1945) mainly based on personal continuity of MPs

- Gallagher, Michael. 2009. Irish Elections 1948-77: Results and Analysis. Routledge.

Coding comments

- Outgoing chairperson of the lower house is automatically re-elected. Seat is added to the respective party ('data_json' keys: 'seats_uncontested', 'outgoing_chairperson').
- due to the STV-PR it is not possible to specify a certain number of absolute votes per party
- when coding the absolute votes per party we count the number of first preferences, which is common practice

Israel

Information

- cabinet status of ministers (cf. Kenig 2014, 181)
 - cabinet ministers — are members of cabinet meetings with voting right in the cabinet plenum. This includes *ministers without portfolio*.
 - deputy ministers — *do not* attend cabinet meetings and *do not* have voting rights. This applies also in [rare] cases of deputy ministers in a government ministry without a minister “above” them.
 - Source: Ofer Kenig, Ashkelon College; personal communication, 28 March 2020
- direct election of prime minister between 1996 and 2003

Data sources online

- Knesset election results
- CBS · Elections and Knesset
- cabinet ministers and cabinet parties (minister list used for cabinet coding)
- description events elections and governments
- parliamentary groups
- changes in parliament

News in English

- Times of Israel

Coding comments

- ministers without portfolio coded as cabinet parties and deputy ministers as cabinet support parties (see above and thanks to Or Tuttnauer for support in 2020)
- cabinets continuing in office (no resignation or lost confidence vote) after an early dissolution of parliament are coded as “continuation caretaker cabinet” (e.g. Netanyahu 2014)
- cabinet support parties coded for deputy ministers and Arab satellite lists
- all changes in parliament included based on Knesset information
- seats for alliance members of United Torah Judaism to be included with a ‘data_json’ key if available
- minor differences in the composition of party lists (esp. electoral alliances)
 - not coded as “party change” for consecutive elections
 - changes of the name and composition are mainly recorded in “description”

Italy

Data sources online

- Archivio Storico delle Elezioni — Ministero dell’Interno
- Annuario statistico italiano 2002
- Composition parliament
- dati.camera.it

News in English:

- ANSA
- Corriere della Sera

Coding comments

- Non-partisan prime ministers coded PC to avoid false matches with election results.
- Parliamentary seats for foreign Italians and the seat of Aosta Valley are determined separately. They are added to the “normal” Italian results

Open questions

- coding of The Coalition electoral alliance

Japan

Data sources online

- Ministry of Internal Affairs and Communications
- Cabinets since 1996

News in English:

- The Japan News,
- NHK World

Coding comments

- elections since 1994
 - only PR tier votes provided

Open questions

- largest party that won no seats missing for most elections
- double check of party families by country expert
- change of party affiliations after 1972 election
- alternative source number of votes and valid votes for 1952 election. inconsistency in Mackie/Rose

Todo later

- update seat composition of parliament at formation of cabinets with EJPR data
- description and final coding of cabinet formation and termination 1958 until today
- add 'seats_smd' to 'data_json'

Latvia

Data sources online

- Central Election Commission of Latvia

News in English:

- Latvian Public Media

Open questions

- double check coding of electoral alliances, especially whether Harmony Center is a party or an electoral alliance
- seat strength of parties in electoral alliances
- party family for MPA-LNP

Todo later

- add alliance members for EP elections
- double check electorate and total votes for EP 2009 election

Lithuania

Information

- PM and cabinet must each pass an investiture vote (article 92 constitution; Matonyte 2019, 309-10).
- Government returns its power after presidential elections (article 92 constitution; Matonyte 2019, 309).

Data sources online

- The Central Electoral Commission of the Republic of Lithuania

News in English

- Lithuanian News Agency
- Delfi.en
- Lithuania Tribune
- Baltic Times

Coding comments

- cabinet start date coded for PM investiture vote (incomplete, see below)
- new cabinet coded for resignation and investiture after presidential elections
- public election committees (visuomeninis rinkimų komitetas)
 - A legal form to run in an election used since 2015 as an alternative to parties
 - We add a prefix to name (“VRK –”), name short (“K-”) and english name (“PEC –”) (e.g. K-AMT 2019)
 - We also add ‘data_json’ entries ‘{“party_type”: “election_committee”, “new_party”: false}’

Open questions

- cabinet investiture votes not documented adequately with media reports
- party family (ideological classification) of public election committees
- seats for Lithuanian Liberal Union and The New Union differ between vrk and Wikipedia/Essex
- coding of 1990 elections 96 Sajudis candidates
- seat strength of *Sajudzio koalicija* in first four cabinets and status of PM

Todo later

- cabinets
 - complete and harmonise coding all PM and cabinet investiture votes
 - consistent coding of cabinet start dates for investiture vote of PM
 - coding of acting prime ministers (see Conrad/Golder 2010, 142)

- add ‘seats_smd’ to ‘data_json’

Luxembourg

Information

- full male suffrage in 1893 election, female suffrage in 1918

Data sources online

- elections.public.lu
- governments

News in English

- Luxembourg Times

Coding comments

- turnout and electorate (registered votes) numbers not available for 1922-1945 (Nohlen 2010, 1245)
- multiple votes per voter, ‘data_json’ keys: ‘multiple_votes’ and ‘votes_total’
- party names are coded in Luxembourgish with a few historical exceptions in French
 - French and German party names are coded in ‘data_json’

Malta

Information

- self-government in 1947, UK rule in 1958, independence in 1964
- STV-PR in 1921

Data sources online

- Electoral Commission Malta
- Elections in Malta

News in English

- Times of Malta

Coding comments:

- due to STV-PR it is not possible to specify absolute votes per party
- when coding the absolute votes per party we count the number of first preferences
- see bonus seats in 1987 election

Netherlands

Information

- full male suffrage in 1917 and female suffrage in 1919
 - 1970: compulsory voting abolished
- two round majority-plurality SMD in 1896
- PR (Hare) in 1918

- The Warsaw Voice

References

- Paszkiewicz, K., 2004. Partie i koalicje polityczne III Rzeczypospolitej 3rd ed., Wroclaw: Wydawnictwo Uniwersytetu Wroclawskiego. [party almanac]

Coding comments

- Müller-Rommel ea. (2004) and Conrad/Golder (2010) code the 28/29 April 1993 as the begin of Suchocka II government. However, the Suchocka I government failed a confidence vote on 28 May 1993 and continued as a caretaker cabinet until its resignation on 18 October 1993.
- German Minority Party (MN) support not included in cabinet_support table. Bergman ea. (2019) mention that since 1991 every government has been supported by the MN.

Open questions

- seats of ‘Democratic Left Alliance’ and ‘Labor Union’ in parliament after [2001 election]
 - coding of split alliance
- SDLP 2005 election — Zieloni and UP on SDLP list or an alliance
- should Pawlak I government be kept? — needs more explicit cabinet definition
- exact date of PPPP split into PPG and MP unknown
- party name change — UW to PD: exact day/month of the change?

Todo later

- double-check and revise party coding (esp. successor/predecessor) with Paszkiewicz (2004)
- re-coding of 1989 election
- coding of SLD alliance members for elections
- coding of changes in composition of parliament as documented in EJPR Political Data Yearbook

Portugal

Data sources online

- Portuguese National Election Commission

News in English

- The Portugal News

Open questions

- Should 1975 assembly election and succeeding cabinets be excluded?
- How long was ID party member of CDU alliance since 1987 election?
- double checking of 1980 election – PSD and PS alliance and district seats
- Who and from which party was the third successful candidate in the CDU alliance in the EP election in 1987?

- Should BE election results be coded as electoral alliance with separate observations for alliance members?

Todo later

- find primary sources for members of electoral alliances (currently Mackie/Rose (1991) and Wikipedia)

Romania

Information

- district-ordered list system in 2008 and 2012 election
- party-list PR since 2016
 - multi-seat districts (M=7)
 - 5% threshold for parties and 8 to 10% for electoral alliances

- Statistical Yearbooks of the Slovak Republic

News in English

- The Slovak Spectator (online archive starting in 1995)
- Radio Slovakia International

Open questions

- Party of the Hungarian Coalition (MK)
 - seats distribution and parliamentary party group status in 1990
 - parliamentary party group status in 1990
- exact seat strength of split parties in Moravcik cabinet
- parliamentary status of Simko SDKU splinter group

Slovenia

Data sources online

- Election Results
- Cabinets

News in English

- Sta
- Slovenia Times
- Radio Free Europe — esp. online archive from 1996 onwards

Todo later

- consistent coding of cabinet start dates for investiture vote of PM or cabinet (see Krašovec/Krpič 2019, 482–83)
- number of votes and total votes for Italian and Hungarian national community seats

Spain

Data sources online

- Official Bulletin of the State
- Info Electoral – Ministerio del Interior

News in English

- El Pais

Coding comments

- official results include blank votes into valid votes (‘Votos Válidos’) – ParlGov ‘votes_valid’ are based on ‘Votos a Candidaturas’
- regional parties which are affiliated with national parties such as the Catalan branch of the PSOE are not coded separately as an individual party in elections
- (most) regional parties and green parties in ParlGov not coded as alliance members in EP elections

Open questions

- more detailed information about types of support for minority cabinets
- information about parliamentary boycott of HB (esp. 1989 election and Gonzalez cabinet)

Todo later

- harmonize and define coding electoral alliances

Sweden

Information

- full male suffrage in 1909 and female suffrage in 1922
- PR (D’Hondt) in 1909, 230 seats

- 1952: Saint-Laguë; 1969: unicameral, 350 seats, upper tier, 4.0% threshold
- cabinet investiture
 - negative parliamentarism since 1. Jan. 1975
 - no absolute majority against cabinet
 - see Instrument of Government (1974: 152) Chapter 12, Art. 3 (page 13)

Changes

Version 2024

Stable version on 12 August 2024 with data updated until June 2023

- release manager: Holger Döring
- data update: Alexandra Quaas, Maike Hesse

New information

- new elections and cabinets from January 2022 to June 2023

Documentation

- added pdf-version codebook (Markdown based)
- added data editors section to credits

- added tables to SQLite database release
 - ‘info_data_source_country’
 - ‘cabinet_confidence_vote’, ‘info_page_content’ and ‘info_variable_json’ (experimental version)
- minor codebook revisions

Corrections and updates

- added no-seat party: DEU 1919–1933, EST 2009-EP, GBR 1983, ITA 2004-EP, POL 2019, SVN 2019, ROU 1990. SVN 2000, SWE 2018, TUR 2015
- renamed cabinet names into ascii: AUT Dollfuss, FIN Kivimaki, FRA Debre, DEU Mueller, DEU Bruening, NOR Lovland
- corrected English spelling party names: AUT I-Nat, CYP SYM, DNK AE, IRL FG, ISR Noam, LVA LKPP, NZL CP, SVN SOPS
- AUT election: recoded Nat-WA into I-Nat
- BGR cabinet 2017: added none with PM
- BGR party: renamed party short R into V (party id 2640)
- CHE cabinet 1902: removed PM coding
- CHE election 2019: only one no-seat party
- CYP cabinet 1976: recoded none
- FIN election 2015: recoded one-seat into AS
- MLT election 2017: added PD
- NLD cabinet 1946: removed VVD
- ROU election EP 2019: corrected seats PLUS

Webpage

- added Markdown version codebook
- prepare archiving of legacy Django implementation
- prepare minimal new Django implementation

Version 2022

Stable version on 29 April 2022 with data updated until December 2021

- release manager: Holger Döring
- data update: Constantin Huber, Alexandra Quaas, Maike Hesse, Lukas Warode

New information

- new elections and cabinets from April 2020 to December 2021
- validated Central- and Eastern European cabinets with Bergman ea. (2019)
- validated West European cabinets with Bergman ea. (2021)
- see also news

Corrections and updates

- NLD cabinet 1946: removed VVD (party id 1409)
- AUS party: recoded CN-QLD into C
- CAN election 2019: recoded votes “none”
- CYP cabinet 2018: removed none
- EST cabinet 1995: recoded party composition
- EST election 1995: added parliament changes
- FRA cabinet 1997: added PRS, V, MC
- FRA cabinets 2016: recoded EELV into PE
- FRA party: recoded RCV into PRS
- ISR elections 2015–2020: added AY and DeTo as alliance members of YaToMe
- ITA party: recoded PdL results from CeD into FI-PdL for 2008 national and 2009 EP election
- JPN election 2012: added HRP
- LTU cabinet 2009: corrected cabinet name (Kubilius)
- LVA election 2018: added KP seats
- NLD election 2010: recoded no-seat into one-seat
- NLD election EP 1984: corrected “party_id” results CP and EuGro
- NLD election EP 1989: recoded CP into CD
- NOR election 1918: recoded one-seat into none
- NZL cabinet 2017: recoded Greens to cabinet support instead of cabinet member
- ROU cabinet 2019: removed (three month rule)
- ROU election EP 2019: recoded and linked USR and PLUS to USR-PLUS (electoral alliance)
- ROU party: recoded PLR into PLR|ALDE
- TUR election 2018: recoded SP into Nation Alliance alliance member

Webpage

- use static page at parlgov.org
- use Docker to run ParlGov web page locally
- retire public version of legacy Django implementation

Version 2020

Stable version on 8 December 2020 (Covid-19 delay) with data updated until March 2020

- release manager: Holger Döring
- data update: Lukas Warode

New information

- new elections and cabinets from April 2018 to March 2020
- AUS and DEU pre-1945 elections and cabinets added

- added EP elections and EU Commission 2019
- added SQLite database file into ParlGov Dataverse (includes experimental version)
- depreciated Twitter news tracker on 1 June 2020

Documentation

- unified codebook (coding rules, country notes, changes, credits) for stable versions
- ParlGov snippets with usage (code) examples
- specified coding rules continuation caretaker cabinet

Webpage

- party – added information about the calculation of party positions
- party – put information about parties (and their names) in external data sets to bottom of page
- party – removed information about party seats from index page of all parties per country
- election, election index – using new names for effective number of parties
- election, election index – disproportionality and advantage ratio with two digits
- election index – party with absolute majority of seats underlined
- cabinet index – show only one election date
- home section – show ‘Quick links’ first and add ‘Data section’ with examples
- documentation – removed key list from list of data sources (kept in experimental version)
- download section – added direct links to csv files of party, election and cabinet table

Database

- new table – ‘parliament_composition’, ‘viewcalc_parliament_composition’, ‘viewcalc_country_year_share’
- table ‘cabinet’ and ‘election’ – fixed bug in determining non-existent previous ids
- table ‘cabinet’ – added columns ‘appointment_date’, ‘resignation_date’ (experimental version)
- table ‘cabinet_party’ – added column ‘description’ and moved (most) ‘comment’ entries into it
- table ‘election’ – added columns ‘dissolution_date’, ‘wikipedia’ (experimental version)
- table ‘election_result’ – added column ‘description’ and moved (most) ‘comment’ entries into it

- table ‘party’ – added column ‘dissolution_date’ (experimental version)
- table ‘viewcalc_election_parameter’ – renamed ‘enep’ into ‘enp_votes’ and ‘enlp’ into ‘enp_seats’
- table ‘viewcalc_election_parameter’ – removed results for party family ‘none’ from calculation
- table ‘viewcalc_party_position’ – renamed ‘eu_pro_contra’ into ‘eu_anti_pro’
- table ‘viewcalc_party_position’ – don’t overwrite missing ‘left_right’ with ‘state_market’
- table ‘view_party’ – renamed ‘eu_pro_contra’ into ‘eu_anti_pro’
- table ‘view_cabinet’, ‘view_election’, ‘view_party’ – added ‘country_name’
- table ‘view_cabinet’ – ‘seats’ now based on ‘viewcalc_parliament_composition’ instead of ‘election_result’

Version 11/07

Stable version 26 July 2011

Data

New information

- elections 2011 added: CAN, CYP, EST, FIN, IRL, PRT
- cabinets added: CAN Harper III, CYP Christofias II, EST Ansip IV, FIN Katainen, FRA Fillon III, IRL Kenny, PRT Coelho, SVN Pahor II
- added NIR – parties only
- updated from seats to votes level data: AUT, CYP, POL
- JPN: added elections and cabinets from 1945 to 1958

Corrections and updates

- recoded nationalist, fascist and right-wing populist party families into ‘right wing’ and added former classifications as additional party families to table ‘party family’
- removed some entries used to define full party names from table party_change and added the information to json field in party table (eg. DEU: CDU, CSU; SWE: SAP)
- replaced missing ‘left_right’ party positions with ‘state_market’ values if available (esp. relevant for Benoit/Laver 2006 data)
- corrected documentation of variable ‘date’ in ‘election’ table
- CYP: removed elections and cabinets prior to 1976 (Polity IV score)
 - added Kyprianou III, Kyprianou V, Vassiliou II, Klerides II, Klerides IV, Papadopoulos II

Webpage

- party – show information about electoral alliances and alliance members in election results (superscript symbol)
- party – show party foundation date
- party – show only year of party change if date is coded as 1 July (default for unknown day/month)
- election, cabinet – show name of party for elections and cabinets based on information in table ‘party_name_change’ (if available)
- election – moved information about ‘Changes of party composition in parliament’ into experimental version
- election – show only results for more than 0.5% vote share
- cabinet – don’t show termination date (experimental version observation only)
- external – corrected publication year references for Castles/Mair, Ray and EU Profiler
- data sources – cleaned up names of some of the entries

Database

- new table – ‘cabinet_support’ to include parties that support (minority) cabinets (experimental version)
- new table – ‘party_family’ to include additional party families for a party
- tables ‘party’, ‘party_change’, ‘party_name_change’ – added column ‘data_source’
- table ‘party’ – added column ‘description’
- table ‘party’ – added column ‘foundation_date’ (experimental version)
- table ‘party_change’ – added variable ‘type_id’ (experimental version)
- ‘view_cabinet’ – fixed issue in view definition to include all cabinets – ticket:65
- ‘view_election’ – added variable ‘previous_cabinet_id’

Version 10/11

Stable version 16 November 2010

Summary

- complete database refactoring – recoding of table/variable names and all id variables – see below

- corrected differences between coded and calculated (votes/votes_valid) vote shares (except PRT) – ticket:56

Webpage

- new web design
- further information about cabinet below list of parties in cabinet
- list ‘comment’ in documentation of table variables
- show 0 seats on election result pages
- government type (minority, minimum winning, oversized) on cabinet pages and cabinet index – ticket:36
- legend for tables on index pages of elections and cabinets
- Famfamfam silk icons for links to downloads
- information about recalculated seat shares in cabinet page
- smaller font size for election date on list of cabinets

Database

- complete database refactoring
 - renaming of tables and variables
 - unique primary keys in all tables (variable ‘id’)
 - * old id variables are kept in core tables with prefix ‘old_’ (eg. ‘old_partyID’ in party table)
 - foreign key enforcement (in Django)
 - ‘data_json’ variable for additional information in some tables (experimental version)
 - coding of all ‘id’ variables in ‘info_id’ – except variables with an own table (e.g. country, party, election)
